Hot/Warm Leads

336

Campaign Responses

STRONGEST ACCOUNT SIGNALS

Whole org is a physical-security buyer base — every account Description encodes a "current footprint -> likely next motion" upsell signal (multi-site rollout, camera expansion, maintenance attach, visitor management).

- Top active expansion accounts: Everline Property Trust (NV, 550K), *AltaCanyonClinics*(CA, 550K), Nevada Horizon Hotels (CO, \$510K), Queen Creek Hotels (NV, \$500K), Xavier Road Logistics (NV, \$425K).
- Highest-intent "next motion" upsells: multi-site rollout at Valencia Campus (367K), *TamarackHealth*(332K); maintenance-attach whitespace at installed-base accounts with no service plan.
- NV + CA concentrate both pipeline and headcount — prioritize rep capacity there.

RISKIEST OPEN OPPORTUNITIES (closing soon, weak signals)

27 of 64 soon-closing deals flagged at-risk. Systemic issue: NextStep is templated filler, often mismatched to the product; ~30 late-stage deals have ZERO logged activity.

- #1 Juniper Hill Academy - Entry System Upgrade (\$250K, close Dec 19): 90% & Negotiation but created same day, no activity, no primary contact, next step about a different product, + 2 open smart-lock cases. Likely a data-integrity problem OR a large deal with no real engagement.
- Also: Copper Sky Storage (250K, *stale + overdue*task), *LakepointDistribution*(250K, no activity), Kingsley Health Network (\$250K, *stale+overdue*), Wildflower Schools (\$175K), Laguna Property Trust (\$250K).

MISSED LEAD & CAMPAIGN FOLLOW-UP

- 166 of 263 hot/warm leads (63%) are underworked (high rating, not qualified, no/stale activity); 93 are HOT and untouched. Biggest sources: Web (42), External Referral (39), Partner (29). Concentrated in NV & CA.
- 0 of 336 campaign responders ever converted to a contact — follow-up gap is org-wide.
- Worst campaigns: Western Region Maintenance Attach (94% gap), Education Campus Access Review (79%), Dormant Customer Winback (79% — paid re-engagement wasted).

NEXT QUESTIONS A SELLER SHOULD ASK

1. Is the Juniper Hill \$250K deal genuinely in negotiation, or is the 90%/stage inaccurate? (Confirm before acting.)
2. Who is the economic buyer on the no-contact deals? (e.g. attach Morgan Ross, Campus Safety Lead.)
3. Which at-risk late-stage deals have a real, product-correct next step — and by when?
4. Why did zero campaign responders convert? Is there a lead-routing / follow-up ownership gap?
5. Which of the 93 hot-untouched leads can we work THIS week, starting with Web & partner-referred?
