

Security-equipment sales org · West/Southwest US · Live Salesforce data via MCP · 2026-07-02

152 accounts · \$24.98M open pipeline across 229 opportunities · 18 active campaigns · West/SW territory (NV, CA, CO, WA, AZ, Product motion: physical security (badge readers, access control, cameras, visitor kiosks, smart locks). Partner/channel motion

- Highest-value open pursuits: Alta Canyon Clinics (CA, 550K) and Nevada Horizon Hotels (CO, 510K) lead open pipeline.
- Best size x pipeline in NV: Xavier Road Logistics (425K, Hot) and Everline Property Trust (375K).
- Greenfield upgrade targets: 15 accounts still on "legacy keys / manual logs" — Falcon Gate Manufacturing (CA, \$425K in flight) is the strongest: large, no modern security yet, active pipeline, Warm.
- Expansion whitespace: Laurel Terrace Housing (NV, 2,500 emp, \$60M rev) has only one small open deal.

- Juniper Hill Academy — Entry System Upgrade \$250K, Negotiation, 90% prob, closes 12/19 — NO activity; all rep tasks are on other (smaller) deals. Flagship deal untouched; 90% likely a stale forecast.
- Lakepoint Distribution — Warehouse Camera Expansion \$250K, Negotiation, closes 12/22 — next step still "confirm decision maker"
- Laguna Property Trust — Maintenance Attach \$250K, Proposal, closes 1/15 — quote out, no follow-up.
- Note: HasOverdueTask / PushCount / LastStageChangeDate are unpopulated org-wide — activity absence is the usable risk signal.

- 94 Hot/Warm leads are underworked (no activity, still Open/Contacted) — 50 are HOT. Concentrated in NV (29), CA (21).
- The gap is source-specific: 0 of 94 came from a partner. All 69 partner-referred leads ARE worked. Breakdown is on Web / External Referral / Advertisement / Trade Show — i.e. marketing & inbound, not channel.
- 9 campaigns have a 100% follow-up gap (every responding lead untouched), incl. the two highest-engagement campaigns (Warehouse Security Assessment, Multi-Site Access Control Webinar). Every campaign leaks $\geq 47\%$ of responders.

1. On the \$250K Juniper Hill deal (and the 41 like it): who is the economic buyer, and is 90% backed by a real commit or stale?
2. Why are marketing/inbound leads not worked while partner leads are — is there a routing/SLA gap for non-partner leads?
3. Which of the 9 100%-gap campaigns justify re-spend, given none of their responders were ever contacted?
4. For legacy-keys greenfield accounts (e.g. Falcon Gate): what is blocking conversion of active pipeline to close?

- Data appears seeded/synthetic: employee counts fall on discrete tiers; campaign engagement is near-uniform (~44 members, ~18-20 responses each); all campaign responses are stamped 2026-12-15; several deal-hygiene fields are unpopulated.
- Treat trends (e.g. response timeline) as flat-by-construction, and account "hidden insight" descriptions as artifacts, not CRM fields.
